DETAILED ACTION

1. Claims 1 – 14 are presented for examination.

Specification

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The amended claim language of “computer readable medium” does not appear in the specification. Applicant is asked to amend or cancel the claim 9 and its dependent claims to alleviate this objection, or point to specific areas of the application that state the phrase “a computer readable medium”, or give a processor, memory or disk disclosed in the specification that is intended to perform the functions of the claim language the definition of computer readable medium so it is known what the Applicant is intending to claim as a computer readable medium. Further analysis of how to alleviate this objection may be found in the Interim Guidelines on 101 which have been entered into the MPEP.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 9 – 12 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim limitations teach a software module and does not have

Art Unit: 2143

language stating that the software module is embodied on any hardware for causing a piece that hardware to perform the claimed functions. As amended the claims could still be interpreted as a wavelength or signal and not specific hardware that is read by a computing device.

5. Similarly, computer programs claimed as computer listings per se, i.e., the descriptions or expressions of the programs, are not physical “things.” They are neither computer components nor statutory processes, as they are not “acts” being performed. Such claimed computer programs do not define any structural and functional interrelationships between the computer program and other claimed elements of a computer which permit the computer program’s functionality to be realized, (i.e., MPEP 2106.01).

Allowable Subject Matter

6. Claims 1 – 8, 13 and 14 are allowed.

Response to Arguments

7. Applicant's arguments with respect to claims 9 – 12 have been considered but are moot in view of the new ground(s) of rejection. See above reasoning.

8. **Applicant is advised to contact the Examiner to aid in furthering prosecution and agreeable claim language to allow the claimed invention.**

Conclusion

Art Unit: 2143

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
